

KOUSHIK KUMAR

Bengaluru, Karnataka | +91 6366164540 | koushikk.hanu@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Information Science and Engineering student with hands-on experience in Python, full-stack application development, AI/ML, and enterprise software solutions. Proficient in Python, JavaScript, TypeScript, React, Node.js, Flask, FastAPI, SQL, and MongoDB, with experience developing data-driven applications, machine learning solutions, and internal business applications. Strong foundation in object-oriented programming, REST APIs, software development, and database systems.

EDUCATION

M S Ramaiah University of Applied Sciences, Bengaluru

June 2023 – June 2027

B.Tech - Information Science & Engineering

EXPERIENCE

Front-End Engineer Intern | Hindustan Aeronautics Limited (HAL)

Aug 2025 -- Sep 2025

- Developed an internal Trainee Management Portal with SQL database integration, secure authentication, dashboards, and trainee record management to automate trainee administration workflows.
- Collaborated with HR and faculty to understand business requirements, implement application workflows, and deliver a solution adopted by the HAL HR Department

AI Developer & Cloud Application Intern | IBM SkillsBuild

Jul 2025 -- Aug 2025

- Built a Linear Regression model to predict the UN SDG Index using data preprocessing, model evaluation, and feature importance analysis.

Machine Learning Developer | Shell – Edunet Foundation

Jul 2025 -- Aug 2025

- Developed a Machine Learning solution to analyze UN Sustainable Development Goals (SDG) data (2000–2022) and predict sustainability progress by identifying the key factors influencing the SDG Index Score.

FEATURED PROJECTS

Risk & Tonic – AI-Based Credit Risk Prediction / *React.js, Node.js, Express.js, MongoDB, Decision Tree* | [Source Code](#)

- Built a full-stack fintech application for credit risk prediction using a Decision Tree machine learning model to assess borrower risk from financial data.
- Integrated the ML model with a React/Node.js application to provide risk predictions through an interactive interface supporting data-driven loan assessment.

Photo Mood Board Generator / *TypeScript, AI/LLMs* | [Source code](#)

- Developed an AI-powered application that analyzes uploaded images to identify dominant colors, themes, and aesthetic characteristics and generates personalized mood boards.
- Integrated OpenAI, Google Gemini, and Hugging Face models for image analysis and generation of intelligent aesthetic insights.
- Built an interactive TypeScript-based interface for image upload, preview, analysis, and mood-board generation.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL

Web & Backend: React.js, Node.js, Express.js, Flask, FastAPI, Socket.IO, REST APIs, HTML5, CSS3

Databases: MongoDB, MySQL, PostgreSQL, IBM Cloudant NoSQL

AI & Data: Pandas, NumPy, Scikit-learn, PyTorch, Matplotlib

Generative AI & LLM: OpenAI API, Google Gemini API, Hugging Face, LLM Integration

Tools: Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, Postman

Core: Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Software Architecture, Software Testing, SDLC

CERTIFICATIONS

- IBM SkillsBuild - AI Developer & Cloud Application Internship.
- Data Engineering on AWS – Foundations.
- Amazon Q – Generative AI-powered Assistant Learning Plan.
- Introduction to Generative AI – Art of the Possible on AWS.
- Accenture Software Engineering Job Simulation
