

KOUSHIK KUMAR

Bengaluru, Karnataka | +91 6366164540 | koushikk.hanu@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Information Science and Engineering student with practical experience in software development, system architecture, AI, and full-stack web development. Proficient in Java, Python, SQL, JavaScript, React, Node.js, Flask, REST APIs, and MongoDB, with internship experience at IBM SkillsBuild and Hindustan Aeronautics Limited (HAL). Passionate about building scalable, efficient software solutions and seeking opportunities in Software Development, Data Analytics, AI/ML, QA, or Cybersecurity.

EDUCATION

M S Ramaiah University of Applied Sciences, Bengaluru

June 2023 – June 2027

B.Tech - Information Science & Engineering

EXPERIENCE

Front-End Engineer Intern | Hindustan Aeronautics Limited (HAL)

Aug 2025 -- Sep 2025

- Developed an internal Trainee Management Portal with SQL database integration, secure authentication, dashboards, and trainee record management, collaborating with HR and faculty to deliver a solution adopted by the HAL HR Department.

AI Developer & Cloud Application Intern | IBM SkillsBuild

Jul 2025 -- Aug 2025

- Built a Linear Regression model to predict the UN SDG Index using data preprocessing, model evaluation, and feature importance analysis.

Machine Learning Developer | Shell – Edunet Foundation

Jul 2025 -- Aug 2025

- Developed a Machine Learning solution to analyze UN Sustainable Development Goals (SDG) data (2000–2022) and predict sustainability progress by identifying the key factors influencing the SDG Index Score.

FEATURED PROJECTS

Risk & Tonic – AI-Based Credit Risk Prediction / *React.js, Node.js, Express.js, MongoDB, Decision Tree* | [Source Code](#)

- Built a full-stack fintech application to assess the credit risk of borrowers based on their financial information. The project combines Machine Learning with a user-friendly interface to support better loan approval decisions.

Bid-Hamster – Real-Time Auction Platform / *Next.js, TypeScript, REST APIs* | [Source code](#)

- Developed a full-stack real-time auction platform that enables users to participate in live bidding with secure authentication and wallet management. The application includes live bid updates, email OTP verification, invoice generation, and an interactive dashboard for a seamless auction experience.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript.

Web & Backend: React.js, Node.js, Express.js, Flask, FastAPI, HTML5, CSS3, Socket.IO, REST APIs.

Databases: MongoDB, MySQL, PostgreSQL, IBM Cloudant NoSQL.

AI & Data: Pandas, NumPy, Scikit-learn, PyTorch, Matplotlib.

Tools: Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, Postman.

Core: Data Structures & Algorithms, Object-Oriented Programming, Data Base Management System, Operating Systems, Computer Networks, SDLC, Software Testing.

CERTIFICATIONS

- IBM SkillsBuild - AI Developer & Cloud Application Internship.
- Accenture Software Engineering Job Simulation.
- Infosys Springboard - TechA Data Visualization using Power BI.
- Infosys Springboard - TechA Network Hacking Prevention Foundation.
- Data Engineering on AWS – Foundations.
- Amazon Q – Generative AI-powered Assistant Learning Plan.
- Introduction to Generative AI – Art of the Possible on AWS.
